

Oncology Clinical Trial Brief — Protocol ORION-3

Generated: 2025-11-22 23:31 UTC

Study Objective

Evaluate safety and efficacy of the investigational biologic OX-14 for metastatic sarcoma patients.

Enrollment Criteria

Adults ages 18-70 with ECOG 0-2, measurable disease per RECIST 1.1, and no prior checkpoint inhibitors in the last 6 months.

Visit Schedule

Screening window 21 days, infusion visits every 14 days, imaging at baseline and every 8 weeks.

Safety Reporting

Adverse events graded per CTCAE v5.0 with 24-hour notification for grade 3 or higher events.
