

FY25 Enterprise Risk Assessment

Generated: 2025-11-22 23:31 UTC

Executive Summary

This assessment consolidates operational, financial, cyber, and regulatory threats across the portfolio.

Risks are prioritized using a likelihood-impact matrix scored during the October 2025 workshops.

Top Tier Risks

1. Third-party data leakage due to unmanaged vendor integrations in LATAM region.
2. Supply-chain interruption for the Aurora hardware line because of rare earth shortages.
3. AI governance gaps in the customer decisioning engine leading to explainability findings.

Mitigation Roadmap

Each tier-1 risk maps to an accountable executive sponsor and quarterly mitigation milestones.

Budget approvals and tooling dependencies are documented for audit readiness.
